

The age of Covid is real. The need for community is real. And the process for getting back to normal is real.

To help us return to life as we knew it, we are offering this fantastic group of concert performances in as normal a setting as possible... No masks. No social distancing. No vapor barrier's. Just music, the audience, the artists and fun. Here are frequently asked questions, you can print this form out or share it with others who want to come to the Concerts at Cardome

CONCERT
FAQ

Are the tickets really free? Yes. Really.

How many concerts can I attend? Any and all of them. Really.

What do I need to reserve my free ticket? For each concert you attend: Proof of vaccination or get vaccinated that night at the concert. Proof of a Covid test or get one that night at the concert. Any printout of the email confirmation that you made the reservation for that concert, or just show it from your cell phone when you arrive. Simple!

What kind of vaccination is being offered? Pfizer only

But I had Moderna or Johnson & Johnson, can I still get my ticket? Yes. All you need is proof of your vaccination, your Covid test and a printout (or cell phone display) of your emailed reservation confirmation.

How are the concerts being presented? In a huge 500 seat open air, well ventilated tent at the historic Cardome Renaissance center in Georgetown with normal concert seating in chairs.

Is it reserved seating? No, first come first serve, the best seats in the house are yours if you get there early.

Will there be food concessions? Yes, we are planning on food trucks, beer and soft drinks, and since it's happening in June we're hoping for one or two ice cream trucks.

When I go to reserve my ticket it tells me to check/arrive in early. Why? It's to allow time for everybody to have a Covid test. Even if you've already had your vaccination everybody is being tested that night. It's how we keep everybody happy, having fun ... and safe ... at the same time. Remember: Covid is real but so is having fun.

What kind of Covid test? It is the new, simple, fast and non-invasive Covid test. It's just the front of your nose and it takes 20 minutes or less for a result. While waiting for the test result enjoy food and drinks and the parklike setting of Cardome.

What if it's raining? No problem, the concerts are happening under a huge tent (a couple in the Cardome chapel concert hall) and so the performances will be rain or shine.

I have young children who cannot be vaccinated, can they still come? Of course, but everybody must be tested in order for everybody to remain safe. Make a reservation for EACH person in your family, including kids. Every individual must make a specific reservation. So if it's "mom and dad and three kids" you make five specific reservations.

I'm driving four or five hours or more to come to one of these concerts, any advice? Absolutely: get a Covid test in your hometown within 48 hours of the concert. It would be a shame to drive that far and find out that you were positive and can't attend. If you're driving a long distance to the concert, get your own Covid test within two days and you will be just fine. Make sure you bring the test results with you.

Is there a dress code for the concerts? Dress comfortably, respectfully, it's June so shorts and sandals and a T-shirt is just fine. Just remember these are family events and kids will probably be present at the concerts as well so, for example, a dude in a bikini is not advisable.

I want to support the effort, what can I do? We would love your help! **First:** If you brought it, leave with it. Don't leave trash behind. **Second:** Help clean up after the concert, we are ALL guests of Cardome and we need to be respectful **Third:** we need parking attendants the night of each concert. **Fourth:** You can volunteer for all the above and/or help the load in/load out crew by sending an email to office@woodsongs.com and put "volunteer" in the subject heading (include your contact info please!)
